

Experiment 9:  
Q) UNDERSTAND TELL NET

---

## Experiment 9

- Q1) To understand the operation of TELNET
- Sim: To understand the operation of TELNET by accessing the router in term from a PC in IT office.

### Topology:

A router connected to a single PC via a fast ethernet interface with copper crossover cable

### Procedure:

- open visa packet tracer and drag a PC & router.
- connect the PC to the router 1 via fast ethernet interface with a copper crossover cable
- Assign the IP address to the PC 10.0.0.2 with gateway as 10.0.0.1
- CLI the router
 

```

router> enable
router# config
router (config)# hostname R1
      
```

```

R1 (config)# enable secret p1
R1 (config)# interface fastEthernet 0/10
R1 (config-if)# ip address 10.0.0.1
255.0.0.0
R2 (config-if)# no shut

R1 (config-if)# line vty 0 5
R1 (config-if)# login
R1 (config-if)# password po
R1 (config-if)# exit
R1 (config)# exit
R1# wr
  
```

In command prompt:

```

ping 10.0.0.1
password for user authentication
is po
password for enable is p1
  
```

### Observations

the PC is able to send the data to the router and indicates that the gateway is available & connected.
